Precise YOUNiQ - Access

Identify You

Precise YOUNiQ is designed to be scalable, fast and accurate, while maintaining the highest levels of convenience, privacy and security using biometric technology

The current issues

The need to have **staff present** in order to register and grant access to visitors and / or employees is **time consuming, inefficient** and **costly**. In addition to this, **tags** or **access cards** can easily be **lost**, misplaced or even **stolen**, making it an **insecure** solution.

The **Precise YOUNiQ** solution

Precise YOUNiQ manages the **full process**, from **registration** to **access**, with no staff needed. A solution that is **convenient, cost efficient** and has the additional advantage of reducing environmental impact by cutting plastic devices to zero.

With facial recognition from Precise YOUNiQ, **you are the key**, no tags or access cards are needed ensuring a **high** level of **security**.

Precise YOUNiQ - Access

How it works

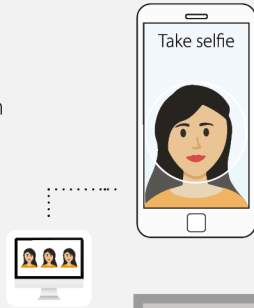

1

Registration link emailed to the new user

2

Remote registration with selfie taken and sent to database

3

Image taken while approaching entrance and verified with stored selfie

4

If image matches the stored selfie the user is granted immediate access to the facility

Precise YOUNiQ key features

Face recognition

Face detection

Precise YOUNiQ identifies the existence and location of faces via a videostream from the camera. Suitable for either a standard entrance system with several users accessing at the same time, or for a mantrap entrance system.

Face identification

Precise YOUNiQ picks out the face and matches it with the template in your local database. This is a match so secure it allows the access to the facility.

Liveness detection

Precise YOUNiQ is based on biometric technology for user identification, nearly impossible to forge. This technology combats paper, screen, mask or a virtual avatar based presentation attacks.

Registration

Email invitation & notification

Precise YOUNiQ allows an administrator to send an invitation via email. An e-mail notification is sent back to the administrator / inviter as soon as a specific (configurable) trigger occurs.

Employee & Visitor self service

Precise YOUNiQ facilitates the convenient online registration with self enrolment included, before arrival.

Precise YOUNiQ key features

Administration

Consent handling

Precise YOUNiQ can manage different consents in the software.

Role based privilege

Precise YOUNiQ enables several administrators to be set to manage different privileges in the software.

Multi sites

Precise YOUNiQ offers a multi site / location centralized administration system.

A flexible system

Visitor system

Precise YOUNiQ is available to issue visitors temporary face passage "keys", in order to know who is visiting, what buildings are being visited as well as the purpose of the visit.

Access control

The Precise YOUNiQ face passage "keys" grant access to selected doors in facilities such as an office, a gym, hospital or a school. The software features a simple access control module that can connect to standalone access control terminals.
